### SKILLS AND TECHNOLOGIES

**Expertise** : HTML | CSS | Bootstrap | React Bootstrap | Tailwind | DaisyUI | Javascript (ES6) | React JS | React Router | Firebase Authentication.

**Comfortable** : MongoDB | Rest API | Express JS | TanStack Query | Jwt | Axios | Stripe

**Familiar** : Node JS | Next JS | Redux | C | C++

**Tools** : VS Code | Git | Github | Figma | Netlify | Vercel | Npm | | Chrome Dev Tools

### RELEVANT PROJECTS

#### \*FurbLock

[Live Link](#) | Github => [Client](#) | [Server](#)

Personalized Experiences, Secure Registration, Seamless Payments

- FurbLock offers a personalized experience for users with distinct roles (admin, instructor, student), tailoring functionalities and permissions accordingly.
- FurbLock ensures privacy and security with Firebase Authentication, handling secure user sign-ups, logins, and password resets.
- FurbLock facilitates smooth and secure online payments through Stripe integration, allowing students to conveniently pay for courses, training sessions fees.

**Technologies** : React Js | Express Js | Tailwind | MongoDB | Firebase | Axios | TanStack

#### \*ToyTown

[Live Link](#) | Github => [Client](#) | [Server](#)

Unlock Endless Fun and Customization for Your Toy Collection

- ToyTown allows you to personalize your toy collection like never before. Upon logging in, you'll have the power to add new toys, delete ones you no longer need.
- My toy website leverages the power of MongoDB, a robust and flexible NoSQL database, to store and manage your toy data.
- Using Firebase Authentication manage user accounts, handle user registration login, and implement various authentication methods such as email/password, social logins.

**Technologies** : React Js | Tailwind | DaisyUI | MongoDB | Firebase | Express Js etc.

#### \*Delicioz

[Live Link](#) | Github => [Client](#) | [Server](#)

Explore, Connect, and Book Talented Chefs with Ease

- My user-friendly platform showcases a diverse community of passionate chefs, each with their own unique expertise and culinary flair.
- When a user clicks the "View Details" button, they will be directed to a page where they can access all the comprehensive details about their favorite chef and user can book his favorite chef. Using MongoDB as the data store for this chef website.
- Using Firebase Authentication manage user accounts, handle user registration.

**Technologies** : React Js | Tailwind | DaisyUI | MongoDB | Firebase | Express Js etc.

### EDUCATION

2021 - PRESENT | BGC TRUST UNIVERSITY BANGLADESH

B.Sc in Computer Science And Engineering

### LANGUAGE

- Bangla - Native
- English - Basic
